[2] *Initial Draft & Images Collection*
[3] *Paper Writing & Experiment Implementation*

ROBOTICS

SCHOOL OF MATHEMATICAL AND COMPUTER SCIENCES

HERIOT-WATT UNIVERSITY

June 2025

Abstract

In accordance with the Academic Regulations, the thesis must contain an abstract preferably not exceeding 200 words, bound in to precede the thesis. The abstract should appear on its own, on a single page. The format should be the same as that of the main text. The abstract should provide a synopsis of the thesis and shall state clearly the nature and scope of the research undertaken and of the contribution made to the knowledge of the subject treated. There should be a brief statement of the method of investigation where appropriate, an outline of the major divisions or principal arguments of the work and a summary of any conclusions reached. The abstract must follow the Title Page.

Chapter 1

Introduction

Give a brief description for the aims of the laboratory and a summary of the results collected. Please write this as constant prose in a way that a fellow student, who does not know anything about the experiment, can understand the approach.

Chapter 2

Experiments

2.1 Theory and Technical Background

Give a brief description of the background theory for the experiment being tackled. Please cite appropriate work. Feel free to add figures into this section, where each figure and each equation may reduce the number of words you use.

2.2 Method

Abridge	Full Name
AAA	AAAAAAA
BBB	BBBBBBBBB
CCC	CCCCC

Keywords: “Key”, Key, Key!
Describe the technical procedures to collect the results. Add figures into this section, where each figure and each equation may reduce the number of words you use.

2.3 Results

Add all appropriate figures and analysis. No formal word count for this section, however, please keep text as concise as possible.

Chapter 3

Conclusions

Please give the conclusions from the characterisations including a summary of the results collected.

.1 Contribution Statement

The contributions of each team member are as follows:

- Yuwei Zhao: Responsible for data processing and experiment implementation.

- Yilin Zhang: Contributed to the initial draft and collected supporting images.

- Haohao Qi: Wrote the final report and participated in experiment implementation.

.2 Source Code

```
print("Hello World")
```
